NEW

COMPUTER APPLICATIONS IN THE BIOSCIENCES

CABIOS is a new international journal for the life scientist who wants to make the most of computers. Every quarter it focuses on the biological applications of computers, reviewing progress and publishing new applications and developments

NUCLEIC ACIDS RESEARCH

The journal is published twice-monthly (24 issues p a) and provides rapid publication for high quality research in nucleic acids, their constituents and analogues. Important papers on the applications of computers to research on nucleic acids are published and the complete collection of published tRNA sequences is included as a supplement with an early issue of each new volume

ABSTRACTS IN BIOCOMMERCE

ABC is a twice-monthly digest of commercial news in biotechnology. Each issue contains concise summaries of current news reports on new products, new research programmes, rights issues, research results, fundings, personnel changes and licensing agreements.

CARCINOGENESIS

Published monthly, *Carcinogenesis* is one of the foremost journals for all aspects of research leading ultimately to the prevention of cancer. As well as providing rapid publication for some of the best papers in cancer research, the journal also regularly provides a 'Commentary' on the current status and future directions for research in areas germane to the cause and prevention of cancer.

CURRENT EYE RESEARCH

Published monthly, *Current Eye Research* is the only rapid publication journal for the international eye research community. Important papers are published in less than half the time taken by the established journals. The journal covers a broad area of clinical and basic research encompassing the anatomy, physiology, biophysics, biochemistry, pharmacology, developmental biology, microbiology and immunology of the eye.

CHEMICAL SENSES

Published quarterly, *Chemical Senses* publishes original papers on taste, smell and all aspects of chemoreception including techniques and the specific application and development of new methods for investigating chemoreception and chemosensory structures.

JOURNAL OF PLANKTON RESEARCH

Journal of Plankton Research covers both zoo- and phytoplankton in marine, freshwater and brackish environments. The main topics covered are the ecology, physiology, distribution, life history and taxonomy of plankton.
