

Books from Information Retrieval

RAPID METHODS & AUTOMATION IN MICROBIOLOGY & IMMUNOLOGY:

A BIBLIOGRAPHY

Contains 2,500 references with complete bibliographic details; comprehensive subject and author indexes; a special addendum containing details of papers presented at the International Symposium on Rapid Methods and Automation in Microbiology held in Cambridge, UK in September 1976.

250 pages; Price: £12.00/US \$24.00; ISBN 0 904 147 07 X

TIME: A BIBLIOGRAPHY

Over 3,000 references, complete bibliographic details and indexes. Covers literature from all disciplines published during the past 20 years relating to this topic.

250 pages; Price: £12.00/US \$24.00; ISBN 0 904 147 05 3

BIBLIOGRAPHY ON MYCOPLASMA

2,600 references from literature published during the past decade; comprehensive bibliographic data; subject and author indexes.

250 pages; Price: £12.00/US \$24.00; ISBN 0 904 147 06 1

OBESITY: A BIBLIOGRAPHY 1964-1973

Includes over 2,000 detailed references; subject and author indexes.

253 pages; Price: £10.00/US \$25.00; ISBN 0 904 147 01 0

TRANSDUCTION MECHANISMS IN CHEMORECEPTION

Information Retrieval Symposium Series

Proceedings of an interdisciplinary symposium organized by the European Chemoreception Research Organisation in September 1973 at the Royal Holloway College, UK. Includes subject and author indexes.

349 pages + 19 page subject and author index; Price: £6.00/US \$15.00; ISBN 0 904 147 00 2

STRUCTURE-ACTIVITY RELATIONSHIPS IN CHEMORECEPTION

Information Retrieval Symposium Series

The second interdisciplinary symposium organized by ECRO, September 1975, Wädenswil near Zürich, devoted to structure-activity relationships in a variety of chemoreceptor phenomena.

197 pages + 36 page subject and author indexes; Price: £10.00/US \$20.00; ISBN 0 904 147 03 7

BIOLOGICAL SEPARATIONS IN IODINATED DENSITY-GRADIENT MEDIA

Information Retrieval Symposium Series

Detailed account of a colloquium held in Glasgow, October 1975. Articles by acknowledged experts in this field. Includes subject and author indexes.

205 pages; Price: £5.50/US \$12.00; ISBN 0 904 147 02 9

IMMUNOLOGIC ASPECTS OF DENTAL CARIES

Proceedings of a workshop on Selection of Immunogens for a Caries Vaccine and Cross Reactivity of Antisera to Oral Microorganisms with Mammalian Tissues, January 1976, Bethesda, Maryland, USA.

222 pages; Price: £5.00/US \$10.00; ISBN 0 917000 00 5

MICROBIAL ASPECTS OF DENTAL CARIES

Proceedings of a workshop held in June 1976, Georgia, USA.

Published in 3 volumes; Price: £15.00/US \$25.00; ISBN 0 917000 01 3

CHEMISTRY OF NUCLEIC ACIDS COMPONENTS

Information Retrieval Symposium Series

Proceedings of the Third Symposium on the Chemistry of Nucleic Acids Components, Liblice Castle, Czechoslovakia, October 1975. Author Index.

183 pages; Price: £6.00/US \$15.00; ISSN 0305 1048

NUCLEIC ACIDS CHEMISTRY

Information Retrieval Symposium Series

Proceedings of the Fourth Symposium on Nucleic Acids Chemistry, Kyoto, Japan, November 1976.

156 pages; Price: £6.00/US \$12.00; ISSN 0305 1048

Instructions to authors

Policy and organisation of the journal

Nucleic Acids Research publishes full papers in English which warrant quick publication, and which describe research on physical, chemical, biochemical or biological aspects of nucleic acids. The majority of papers acceptable for publication would fall within one or more of the following subject areas:

Physical and organic chemistry of nucleic acids. Their constituents and analogues.

Nucleic acid biochemistry including enzymology. The role of nucleic acids in gene regulation and in virology.

Papers on properties of nucleotide coenzymes and simple purine and pyrimidine derivatives that have no relevance to the function and properties of the nucleic acids themselves will not normally be acceptable.

Papers should not normally exceed 20 pages in length. The typewritten manuscript will be reproduced photographically, which will eliminate the necessity to correct proofs and will result in fast publication (average 6-8 weeks).

Each manuscript will be refereed by two scientists who have been instructed to try to recommend acceptance or rejection of a paper and to avoid suggesting minor alterations to content or style. Preliminary or short communications which do not contain sufficient experimental documentation are not accepted.

Submission of a paper implies that it reports unpublished work, that it is not under consideration for publication elsewhere and that, if accepted, it will not be published elsewhere in the same form either in English or in any other language without the consent of the publisher. Manuscripts (the original and two copies, between cardboards to avoid creasing) should be submitted thus:

from the Americas to:

Professor Dieter Söll,
Yale University, Box 1937 Yale Station
New Haven, Connecticut 06520, USA

from the rest of the world to:

Dr. R.T. Walker,
Department of Chemistry
University of Birmingham
PO Box 363, Birmingham B15 2TT, England

It is essential that manuscripts be prepared according to the instructions which follow. Manuscripts which do not conform to this specification may have to be returned for re-typing.

Preparation of manuscripts

Specially ruled typesetting sheets are available on request and the editors recommend their use by authors wherever possible.

It is the policy of the editors to allow a flexible style of presentation of papers but, to help us maintain a high standard of appearance and readability, please ensure that your typescript is in black (not grey), on good quality white paper and conforms to the following rules:

(a) Type the title, author and address on a separate sheet of paper. This will be re-typed by the publisher to a standard format.

(b) Start page 1 with your abstract, which should not exceed 15 lines. Then start the main text of your paper. After filling a depth of 180mm (7in) including the abstract, start page 2.

(c) Continue your paper, filling each page to a depth of 240mm (9½in) except the last page, which may fall short.

(d) The width of all copy (i.e. the longest lines) must not exceed 165mm (6½in).

(e) Each page should be numbered at the bottom in *light blue*. The dimensions quoted above include all diagrams/figures.

(f) Type the abstract and references at single line spacing.

(g) Type all main text at one-and-a-half time spacing (usually three 'clicks'). The number of lines expected on a page is 36 - 38.

(h) Type heading to sections (e.g. ABSTRACT, INTRODUCTION etc) in underlined CAPITALS, aligned with the left-hand margin.

(i) Indent the first line of each paragraph but do not leave any extra space between lines.

(j) Align diagrams/figures and their legends and captions with the left hand margin. Type the legends at single line spacing. Do not leave excessive space above or below diagrams/figures. Text and diagrams should normally be in sequence as appropriate to the sense of the paper. Legends should be brief and are not expected to make the figures meaningful without reference to the text. Diagrams can be submitted independently of the text, in which case they may then be photo-reduced by the publisher.

(k) Original photographs are accepted when they are of high quality but must not be larger than page size (9½" x 6¼"). A charge will be made for publication of a colour plate.

(l) Footnotes, including abbreviations and changes of address, should be indicated with superscript figures and included in the references.

References

The citation of journals' (abbreviated in the style of 'Chemical Abstracts'), books and multi-author books should conform with the following examples (**single line spaced without indenting**)

- 1 Razzell, W.E. and Khorana, H.G. (1958) *Biochim. Biophys. Acta* 28, 562-566
- 2 Davidson, J.N. (1969) *The Biochemistry of the Nucleic Acids*, 6th edn. pp. 177-178. Methuen, London
- 3 Burdon, R.H. (1971) in *Progress in Nucleic Acid Research and Molecular Biology*, Davidson, J.N. and Cohn, W.E., Eds., Vol II, pp. 33-79. Academic Press, New York

Nomenclature

As far as possible, authors should follow the Recommendations of the IUPAC-IUB Commission on Biochemical Nomenclature, and particularly the abbreviations for nucleic acids, polynucleotides and their constituents (1971) *J. Mol. Biol.* 55, 299-305.

Reprints

Owing to the short production time for papers in this journal, an estimate of the number of reprints required should accompany each manuscript. Upon acceptance a reprint price list and order form will accompany our notification. Thirty reprints will be supplied free of charge.
